

decision tree: THE LEVEL OF IMPORTANCE FOR THE CLIENT.
WHAT DOES THE CLIENT WANT VS WHAT WE FIND A PRIORITY.

goal: to simplify the navigation of parts

what are the cross cutting concerns?

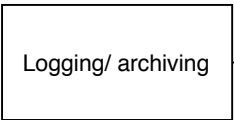

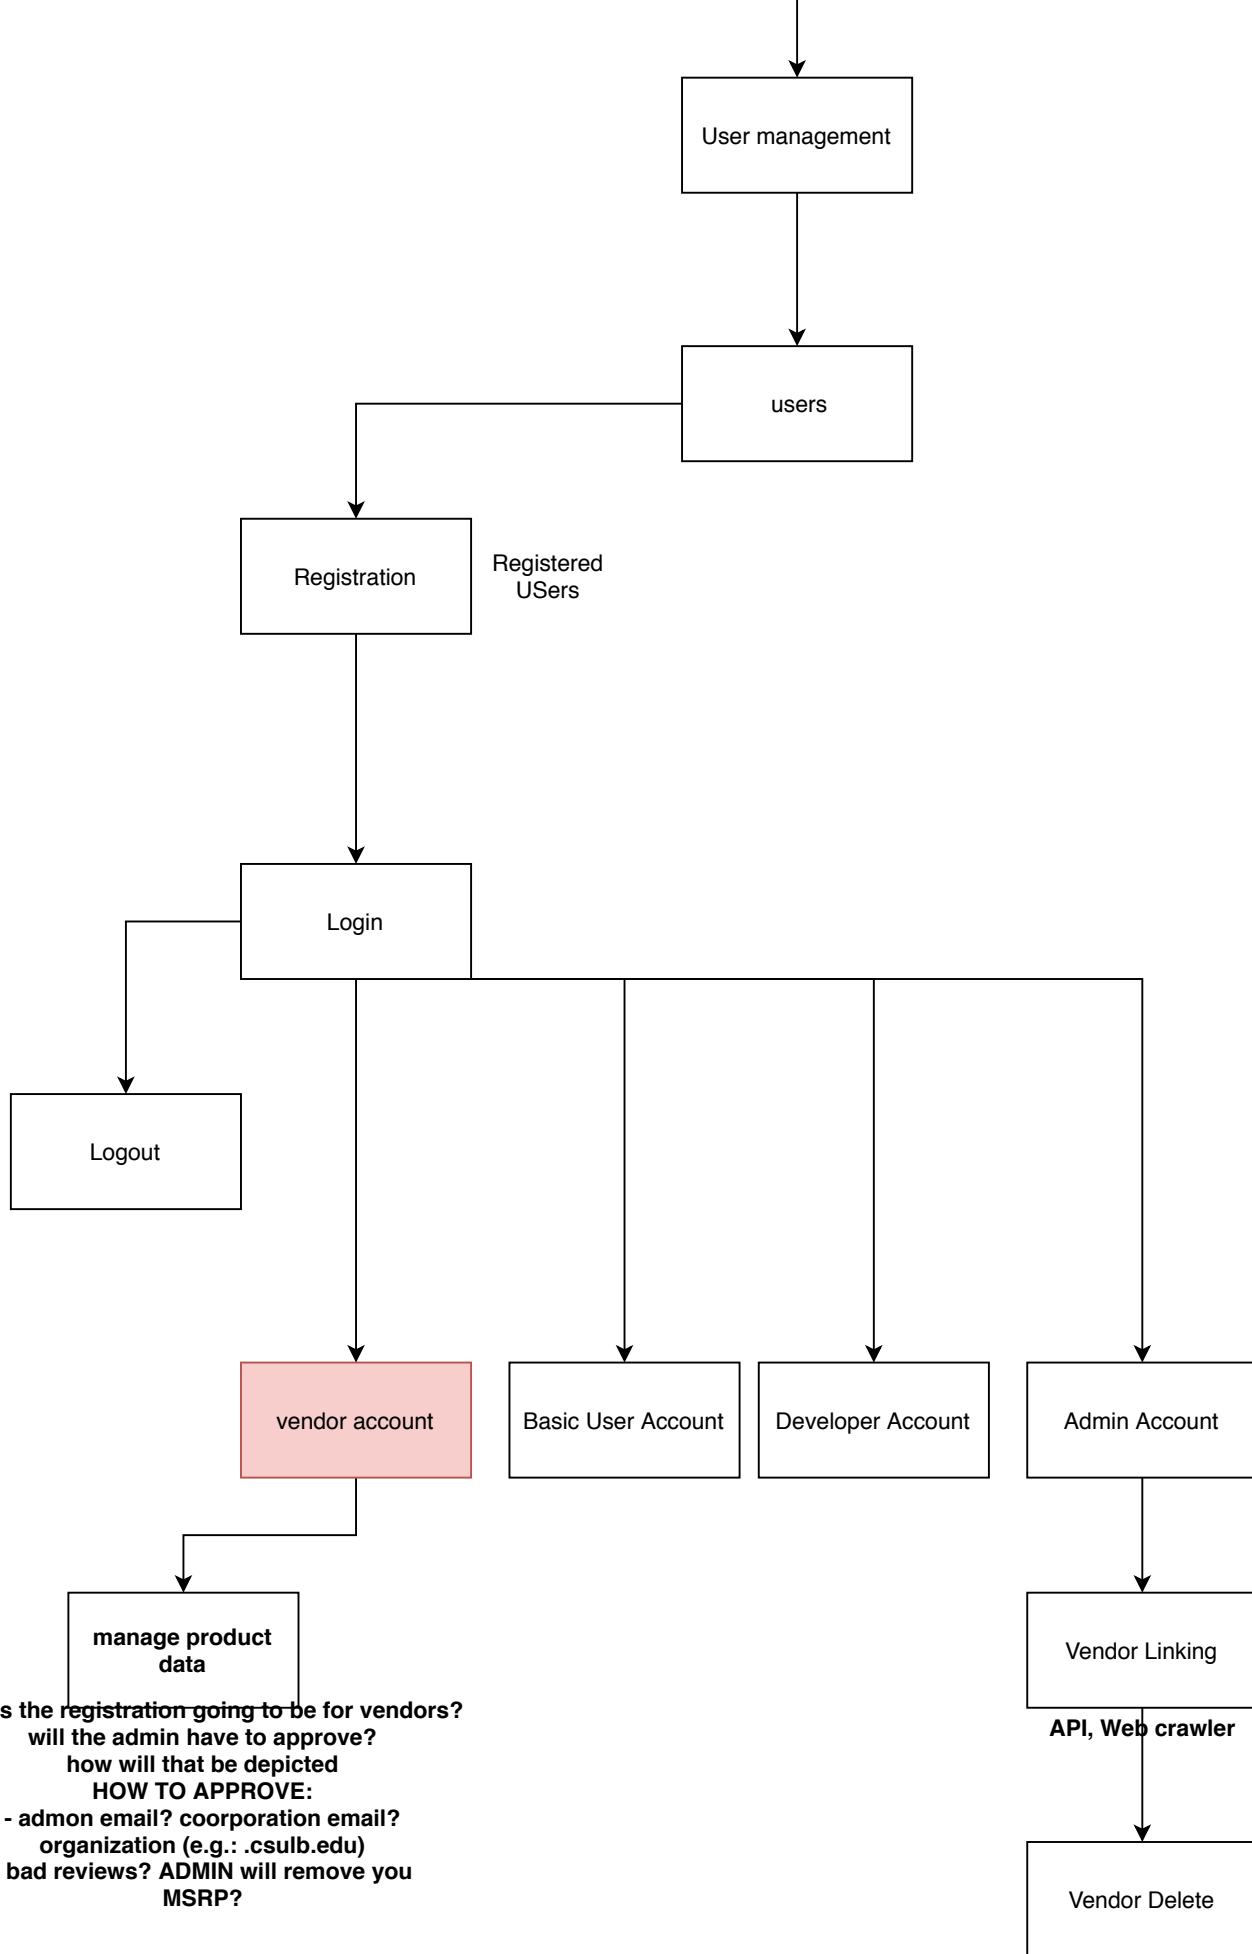

to get to website you need a network

in order to save user privacy setting we need somewhere to store it.

see components catalogue for more info

how is the registration going to be for vendors?
will the admin have to approve?
how will that be depicted
HOW TO APPROVE:
- admon email? coorporation email?
organization (e.g.: .csulb.edu)
- bad reviews? ADMIN will remove you
MSRP?

**example admin wants to add
amazon via API or web crawler**

Where to be placed
think of placing these after Users

PC Builder/ Upgrader

Components
Catalogue

Most popular PC
build

Support Page

**need to acknowledge
parts are existent
without a link to a
vendor that sells them**
