
491 A Project Proposal

*“Travel-Safe”- all your
travel worries
accommodated for!*

Document Version Number: Version 1.0

Date: September 5, 2020

Author: Zeinab Farhat

Overview

Why wait to travel, post-isolation? Introducing the Travel-Safe application! The application that allows you to search for flights, the best stops to take to a destination, putting into account layover and cost, and fills you in on the COVID statistic/ cases within the area of your destination. In addition, should the case where you cancel your flight our application will verify airlines that allow a change fee waiver to book into 2021!

This application does not just give you recommendation for purchasing flight tickets, but also gives you a rating/ review on the COVID circumstances in that area and the best hotels to stay at that are COVID approved!

Goals

The goal of this software will be to offer:

- User Registration
- Filtering destination with COVID site reviews
- Offers an overview on multi-destination travel with minimum layover time
- Reviews of nearest hotels and sites to destination airport

Specifications

The list of goals this application aims for:

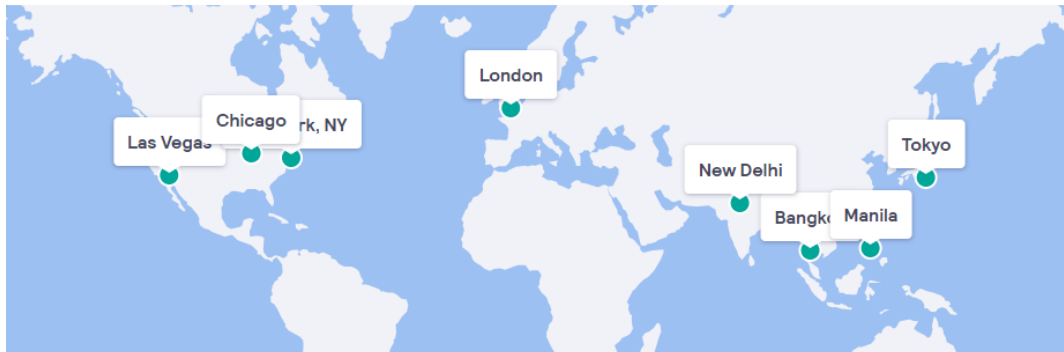

- Transactions capability
- Bookmarking flights and listing recommended flights
- Show mapping of COVID cases to certain destinations you want to go to

An Example could be: skyscanner.com, which shows the “whole world at a glance”

Be inspired

See the whole world at a glance with our flight price map

[Search Everywhere >](#)

Or maybe altering what Priceline. Com shows: But instead of discovering deal they give us statistics

Discover deals in every city
